

AT&T invites you to a live webinar

Web 2.0 Tools for Learning

An overview of opportunities for schools

Date: November 16, 2007

Time: 2:00 PM EDT

Duration: 1 Hour

Discover the dynamically evolving world of web-based applications that are leading schools into a new era of constructive pedagogy through increased interactivity and student-controlled learning. Web 2.0 tools offer compelling options for authentic assessment of student knowledge and skills, real-time and asynchronous collaboration with geographically distant learners, and safe venues for students to publish their ideas on the global stage. This session focuses on practical suggestions for teachers and educational administrators to use web 2.0 technologies with students.

Featured Speaker: **Wesley Fryer**
Author, Digital Storyteller, Educator
Awarded "Best Learning Theory Blog" in 2006
by eSchoolNews and Discovery Education:
www.speedofcreativity.org

Featured Speaker: **Vicki Allen**
Veteran teacher, library media specialist
and Education Director for AT&T.

Who should attend?

Teachers, Principals, Superintendents
Curriculum Directors, Technology Directors

Webinar Details:

In this working session we will:

- Explore how blended learning tools and teaching methodologies are helping improve student acquisition of traditional as well as digital literacy skills.
- Review examples of K-12 teachers and students using web 2.0 technologies to safely publish student work.
- Explore how online social networks and professional development opportunities are providing sustained opportunities for teacher growth and collaboration around the world.
